EDUCATION

AMC Engineering College, Bengaluru

B.E. in Information Science & Engineering

Dec 2022 – May 2026

CGPA: 8.34/10

St. Francis College, Bengaluru

PUC – Science (PCMCs)

Jun 2020 – Jul 2022

74%

Royal English High School, Bengaluru

SSLC (10th Standard)

Mar 2020

80%

TECHNICAL SKILLS

Languages & Paradigms

Python, Java, JavaScript, C, SQL, HTML, CSS, OOP

Frameworks & Libraries

Django, React, Node.js, TypeScript

Databases

PostgreSQL, Supabase, SQL (Relational Database Design and Querying)

Data & BI Tools

Power BI, Tableau, Excel, DAX, Power Query

Developer Tools

VS Code, Git, Ubuntu

PROJECTS

VirtualSpace – Web Job Portal & Blogging Platform

Tools: Python, Django, PostgreSQL, HTML, CSS, JavaScript

- Designed and developed a full-stack web application using Django's MTV architecture, implementing back-end business logic in Python using object-oriented programming principles.
- Built five independently modular features — job listings, user auth, blog, profile, and admin panel — with a PostgreSQL relational database back-end and a responsive front-end interface.

Forensic Face AI – Intelligent Suspect Identification System

Tools: React, TypeScript, pgvector, Python

- Engineered a full-stack AI tool that converts natural-language eyewitness descriptions into forensic sketches via a chatbot interface, embedding results as 768-dimensional vectors for pgvector similarity search.
- Implemented confidence-threshold triggers (>80%) for automated Telegram alerts, with a canvas-based overlay UI built in React and TypeScript for analyst review.
- Debugged and optimized vector similarity matching logic, balancing retrieval accuracy against response latency.

Web-Based Real-Time Chat Application

Tools: JavaScript, HTML, CSS, Supabase (PostgreSQL)

- Built a responsive real-time chat application using vanilla JavaScript on the front end and Supabase (PostgreSQL) as the relational database back-end for dynamic message persistence.
- Designed a clean, reload-free user interface using HTML and CSS, enabling seamless live communication across devices without page refreshes.

Customer 360 Dashboard

Tools: Power BI, DAX, Power Query, Excel

- Developed an interactive Power BI dashboard to analyze customer demographics, transaction history, and churn risk across multiple business dimensions.

- Implemented DAX measures for KPI calculations and dynamic slicers, enabling real-time filtering and self-service reporting for stakeholders.

EXPERIENCE

PySpiders BTM Branch, Bengaluru

Jan 2026 – Ongoing

Python Full Stack Intern

- Building full-stack web applications across the complete application stack — front-end UI with HTML, CSS, and JavaScript (React) and back-end logic with Python and Django, following object-oriented design principles throughout.
- Developed VirtualSpace, a Django MTV-architecture web portal with five core modules — job listings, user authentication, blogging, profile management, and an admin dashboard — applying relational database design with PostgreSQL.
- Troubleshoot and debugged code issues across front-end and back-end layers, iterating on features based on user requirements and mentor feedback within an agile development workflow.
- Continuously deepening knowledge of modern frameworks (Django, Node.js), database design, and software development best practices to build scalable, user-friendly web solutions.

Dyashin Technosoft Pvt. Ltd

Aug 2025 – Dec 2025

Data Analytics Intern

- Participated as a shadow resource on live client projects, contributing to the full software development lifecycle under professional mentorship in an agile team environment.
- Developed hands-on skills in Python (OOP-based scripting), SQL (relational database queries and reporting), Power BI, and Tableau for data analysis and business reporting.
- Reviewed project deliverables and functional requirements, gaining introductory exposure to industry quality standards and structured validation processes.

LearnFlu

Apr 2025 – July 2025

Data Analytics Intern

- Performed data cleaning, transformation, and visualization on real-world datasets using Python, Excel, and Power BI.
- Extracted meaningful insights to support business decision-making tasks.
- Gained hands-on skills in Python , SQL , Power BI, and Tableau for data analysis and business reporting.
